

<b>Associate Editors</b>	<b>ix</b>
<b>Contributors</b>	<b>xi</b>
<b>Preface: Cutting-Edge Anesthesiology</b>	<b>xxv</b>
Arna Banerjee, Richard P. Dutton, Francis V. Salinas, and Laurence C. Torsher	
<b>Are Surgical Site Infections an Anesthesiologist's Problem?</b>	<b>1</b>
Philip J. Leisy, Robert D. Barnes, and Liza M. Weavind	
Introduction	1
Perioperative antibiotics	2
Antibiotic timing	2
Antibiotic delivery	4
Antibiotic concentration	6
Other considerations	9
Summary	11
Conflicts of interest/disclosure	11
<b>Current Approaches to Resuscitative Endovascular Balloon Occlusion of the Aorta Use in Trauma and Obstetrics</b>	<b>17</b>
Linden O. Lee, Paul Potnuru, Christopher T. Stephens, and Evan G. Pivalizza	
Introduction	17
Principles of resuscitative endovascular balloon occlusion of the aorta placement	18
Physiology of resuscitative endovascular balloon occlusion of the aorta balloon inflation	20
Cardiac	20
Pulmonary	21
Renal	21
Mesenteric	21
Cerebral and spine	21
Reperfusion management in resuscitative endovascular balloon occlusion of the aorta	22
Data for resuscitative endovascular balloon occlusion of the aorta in civilian trauma	22
	<b>xv</b>

Data for resuscitative endovascular balloon occlusion of the aorta in obstetrics	24
Risks and complications of resuscitative endovascular balloon occlusion of the aorta	25
Arterial access	29
Balloon placement and management	29
Balloon deflation	29
Removal of arterial sheath	29
Summary	30
Care points	30
Disclosure	30

## **Scratching the Surface: Endothelial Damage in Traumatic Hemorrhagic Shock** **35**

Justin E. Richards, Ron E. Samet, and Thomas E. Grissom

Introduction	36
Endothelial glycocalyx structure	36
Traumatic hemorrhagic shock and endotheliopathy of trauma	38
Endotheliopathy of trauma	38
Endothelial dysfunction and glycocalyx degradation in trauma	39
Vascular barrier permeability and endothelial glycocalyx degradation	39
Inflammation	40
Coagulopathy	41
Vascular tone and blood flow	42
Endotheliopathy of trauma and organ failure	42
Therapeutic options for endothelial dysfunction in traumatic hemorrhage	43
Fresh frozen plasma	43
Prothrombin complex concentrates and cryoprecipitate	45
Tranexamic acid	46
Summary	46
Care points	47

## **Optimizing a Surgical Practice from Start to Finish** **53**

Adam W. Amundson, Adam K. Jacob, Chris M. Duncan,  
Alvin M. Tsang, Kathryn W. Zavaleta, and Hugh M. Smith

Introduction: The need for change	53
Practice optimization case study: The oasis projects	55
Methodology for practice optimization: The roadmap to change	55
Architecture	56
Assessment	57
Analysis	58
Tactics	58
Implementation	59
Translation	59
Lean and health system engineering tools and principles: Purpose and application	59
Comprehensive coordinated care	60
Eliminate non-value-added work	60

Co-Locate	62
Eliminate redundancy	62
Decrease waiting on resources or personnel	63
Standardization	64
Simplify	65
Communication and collaboration	65
Use parallel processing	65
Remove constraints	66
Patient-centered care	67
Develop an shared consciousness	67
Continuous practice improvement	69
Spotlight what is important	69
Marginal gains add up	70
Discussion: Lessons learned	70
Motivated leadership	70
The language of practice optimization	71
The purpose of surgery	71
Preoperative processes drive downstream flow and efficiency	71
Teamwork and collaboration	71
Data are king	71
Every little bit helps	71
Patient-centered care	71
Every process and practice benefits from standardization	71
Coordination and integration	71
History does not have to repeat itself	72
Practice optimization is not free or easy	72
Gain institutional sponsorship	72
Summary	72
Care points	73
Disclosure	73

## **Perioperative Considerations for Person-Centered Gender-Affirming Surgery** **77**

Luis E. Tolinche, William E. Rosa, and  
Christian D. van Rooyen

Introduction	78
Preoperative considerations	81
History taking	81
Estrogen	82
Cyproterone acetate	83
Spironolactone	83
Testosterone	83
Associated medical conditions and priorities	84
Physical examination	85
Facial feminization	85
Vocal feminization	86
Facial masculinization	86
Chest binding	86

Perioperative risk assessment	87
Additional testing	87
Intraoperative considerations	88
Anatomic considerations	88
Drug dosing	88
Drug interactions	89
Airway	89
Postoperative considerations	90
Pain	90
Postoperative nausea and vomiting	90
Cultural humility to guide person-centered gender-affirming care	90
Summary	91
Care points	92
Disclosure	92

## **Pushing the Envelope: New Patients, Procedures, and Personal Protective Equipment in the Ambulatory Surgical Center for the COVID-19 Era** **97**

Steven Young, Richard J. Pollard, and Fred E. Shapiro

Introduction	98
Patient populations	98
Ambulatory procedures	100
Orthopedic surgery	100
Endoscopy	100
Plastic surgery	101
Neurosurgery	101
Thoracic surgery	102
Gynecologic surgery	102
Pediatric surgery	102
COVID-19	103
Postoperative outcomes in COVID-19	103
COVID-19 testing	104
COVID-19 vaccination	105
Personal protective equipment in the age of COVID-19	105
Case cancellation in the COVID-19 era	106
Summary	107
Care points	108
Disclosure	108

## **Perioperative Considerations for Patients with a Known Diagnosis of Dementia** **113**

Julie R. Mcswain, Joel M. Sirianni, and Sylvia H. Wilson

Introduction	113
Dementia types, prevalence, and genetics	115
Preoperative considerations	116
Informed consent and ethical considerations	116
Evaluating for common comorbid disease states	117

Establishing multidisciplinary care and reviewing pharmacologic interventions	117
Intraoperative considerations	120
Impact of surgery and anesthesia on dementia	120
General anesthesia	121
Regional anesthesia	121
Intraoperative medications	122
Cerebral monitoring	122
Modifiable risk factors	122
Postoperative considerations	123
Postoperative delirium	123
Communication barriers	127
Postoperative pain control	127
Sleep disturbances	127
Future directions	128
Care points	128
Disclosure	129

**Influence of Perioperative Handoffs on Complications and Outcomes** **133**

Amanda Burden, Christopher Potestio, and Erin Pukenas

Introduction	133
Significance	134
Communication: Briefing and debriefing	134
The perioperative environment	135
Standardizing handoff communication	136
Teamwork	136
Anesthesia handoff components (intraoperative and postanesthesia)	137
The preoperative elements	137
Surgical case elements	137
The World Health Organization surgical safety checklist	137
Intraoperative handoffs	138
Postoperative handoffs	139
Postoperative transitions to the intensive care unit	140
Postanesthesia care unit (PACU)	141
Transitioning the postprocedural patient from the postanesthesia care unit	141
Summary	143
Care points	144
Acknowledgments	144
Disclosure	144

**The Impact of COVID-19 on the Status of the Anesthesiologists' Well-Being** **149**

Rebecca Aron, Joseph Pawlowski, Mohanad Shukry, and Sasha Shillcutt

Introduction	149
--------------	-----

Definition of burnout	150
Prevalence of burnout in anesthesiology	152
Contributors of burnout in anesthesiology	153
Impact of physician burnout on institutions	154
Patient effects	155
Medical errors	155
Financial implications	156
Impact of burnout on individuals	157
Consequences of COVID-19 on burnout in anesthesiology	157
Financial impact	158
Identifying burnout in anesthesiology departments	159
Am I burned out or just stressed?	160
Prevention of burnout and emotional exhaustion from COVID-19	160
Individual	161
Team	161
Institutional	161
Strategies to recover from burnout	162
Developing well cultures	162
Summary	163
Funding source	164
Disclosure	164

## **Neuromuscular Blockade Monitoring and Reversal: A Clinical and Pharmacoeconomic Update** **169**

Wade A. Weigel and Stephan R. Thilen

Introduction: nature of the problem	169
Assessment of Depth of Neuromuscular Blockade	171
Indications/contraindications	176
Complications and management	177
Reporting, follow-up, and clinical implications	177
Outcomes	183
Current controversies/future considerations	184
Summary	184
Care points	185
Disclosure	185

## **Perioperative Point-of-Care Ultrasound** **189**

Melissa Byrne, Michael Singleton, Hari Kalagara, and Stephen C. Haskins

Introduction	190
Airway ultrasound	190
Brief clinical case	190
Background	191
Clinical case revisited	193
Lung ultrasound	193
Brief clinical case	193
Background	193
I-AIM framework	194

Clinical case revisited	198
Abdominal/pelvic ultrasound (fast examination)	198
Brief clinical case	198
Background	199
I-AIM framework	199
Clinical case revisited	200
Gastric ultrasound	204
Brief clinical case	204
Background	204
I-AIM Framework	205
Clinical case revisited	205
Focused cardiac ultrasound	205
Brief clinical case	205
Background	205
Summary	211
Care points	211

## **Regional Anesthesia for Cardiac Surgery: A Review of Fascial Plane Blocks and Their Uses** **215**

Matthew J. Ritter, Jon M. Christensen, and Suraj M. Yalamuri

Introduction	215
Background	216
Thoracic fascial plane blocks	217
Transversus thoracis muscle plane block	217
Background	217
Current evidence	217
Indications	218
Contraindications/complications/limitations	218
Anatomy and technique	219
Pectointercostal fascial plane block	220
Background	220
Current evidence	221
Indications	221
Contraindications/complications/limitations	222
Anatomy and technique	222
Pectoralis nerve block	223
Background	223
Current evidence	224
Indications	224
Contraindications/complications/limitations	225
Anatomy and technique	225
Serratus anterior plane block	226
Background	226
Current evidence	226
Indications	227
Contraindications/complications/limitations	227
Anatomy and technique	227
Erector spinae plane block	228

Background	228
Current evidence	229
Indications	230
Contraindications/complications/limitations	230
Anatomy and technique	231
Discussion	231
Summary	234
Disclosure	235
Care Points	235
Supplementary Data	235

## **Simulation Training for Crisis Management: Demonstrating Impact and Value** **241**

Huong Tram Duran and William McIvor

History Of crew resource management in anesthesia	241
Classic crisis resource management	242
The checklist	242
Advanced cardiovascular life support	243
Anesthetists nontechnical skills system, an early alternative model of crisis resource management	244
Simulation education in obstetric emergencies	245
Team strategies and tools to enhance performance and patient safety	246
Simulation in times of public health crisis	247
Severe acute respiratory syndrome	247
Simulation in continuing professional development	249
Simulation-based learning of new techniques and procedures	250
Patient safety initiative	252
Challenges in integrating crisis resource management training with simulation into practice	253
Catalyst for lifelong learning	254
Disclosure	255

## **Telehealth in Anesthesia** **259**

Adam K. Jacob, Lisa M. Belch, and Sher-Lu Pai

Introduction	259
Advantages of virtual preoperative encounters	261
Process efficiency	261
Patient and provider experience	261
Clinical outcomes	261
Cost savings	262
Approach to preoperative telemedicine	263
Stakeholders	263
The “previsit” visit	263
Method of contact	263
Patient selection	264
Documentation and billing	265
Limitations and risks of telehealth	265
Medical licensure	265

Patient comfort, capability	265
Network availability	266
Physical examination	266
Preoperative testing	266
Security and health insurance portability and accountability act	266
Summary	266
Care points	267
Conflicts of interest	267
Disclosure	267

## **Anesthesia for Fetal Interventions - An Update** **269**

Monica Hoagland and Debnath Chatterjee

Introduction	269
Anesthetic management considerations	272
Preoperative assessment and multidisciplinary coordination	274
Anesthetic requirements	276
Uteroplacental perfusion and uterine tone	278
Fetal assessment	279
Anesthetic techniques	279
Preoperative management	279
Anesthetic management	280
Management of uterine tone	281
Fetal monitoring and resuscitation	283
Emerging trends	284
Neurotoxicity concerns	284
Role of dexmedetomidine	285
Fetoscopic myelomeningocele repair	285
Summary	286
Care points	287
Disclosure	287
